SUMMARY

Motivated and detail-oriented aspiring Java Full Stack Developer with skills in Core Java, SQL, Front-End Technologies, and experience building academic and personal projects. Quick learner with strong problem-solving abilities and adaptability to new technologies. Eager to take on new challenges that support both professional growth and organizational success.

SKILLS

- **Programming Languages:** Java, SQL, JavaScript
- **Backend Technologies:** Spring Boot, Java Servlets, REST APIs, JPA/Hibernate, JWT Authentication, Spring Security (Basics)
- **Front-End Technologies:** React.js, HTML5, CSS3, JavaScript, Responsive Web Design
- **Core Java:** OOPs Concepts, Exception Handling, Multithreading, Collections Framework, JDBC, File Handling.
- **Database:** MySQL, SQL Queries, Joins, Subqueries, Constraints, Database Design.
- **Tools & Platforms:** Eclipse, VS Code, GitHub, Postman.
- **Soft Skills:** Problem Solving, Team Collaboration, Communication Skills, Adaptability, Quick Learning

EDUCATION

Bachelor of Computer Application Mahatma Gandhi Memorial Evening College, Udupi CGPA : 8.26 [6th Sem]	2022 – 2025
Karnataka Pre - University Board Shree Dharmasthala Manjunatheshwara PU College, Honnavar	2020 – 2022
Central Board of Secondary Education Shree Maruthi Residential School, Bangarmakki	2019 – 2020

PROJECTS

- StuddyBuddy- AI Study Assistant**
Tech Stack: Java 17, Spring Boot, Spring Security, JWT, React.js, MySQL, JPA/Hibernate, REST APIs,
- Developed a full-stack AI-powered study platform featuring Topic Management, Notes, Study Materials, Dashboard Analytics, and AI Learning Modules.
 - Implemented secure JWT-based Authentication and Authorization using Spring Security to protect RESTful APIs with stateless session management.
 - Designed and integrated AI-driven features such as Smart Summarization, Quiz Generation, Flashcard Creation, Topic Explanation, and Personalized Study Plans, enhancing learning efficiency.
 - Built a responsive React dashboard with real-time study analytics, file management, progress tracking, and CRUD operations across 4 interconnected entities, backed by MySQL and JPA/Hibernate.
 - Developed and tested REST APIs using Spring Boot and Postman while following clean architecture and Git-based version control practices.
- Medicare-Hospital Management System**
Tech Stack: Java 21, Jakarta Servlet API 5, JSP/JSTL, JDBC, DAO Pattern, MySQL 8, Bootstrap, Maven, Apache Tomcat
- Built a full-stack role-based HMS using Java Servlets (Jakarta EE 5) & JSP, implementing three independent portals — Admin, Doctor, and Patient — each secured with session-based authentication and role-specific access control.
 - Designed a normalized MySQL database with 5 interlinked entities (Admin, Doctor, User, Appointment, Specialist) and implemented the DAO pattern with JDBC, exposing 20+ servlet endpoints to handle full CRUD operations across all modules.
 - Engineered a complete appointment lifecycle — patients book appointments with doctor selection, doctors review cases and update status with clinical notes, and admins manage doctor/specialist records and monitor system-wide activity — packaged as a Maven WAR and deployed on Apache Tomcat.

CERTIFICATES AND ACHIEVEMENTS

- **Java Full Stack Development Certification**
Currently undergoing training in Java Full Stack Development with focus on java, backend development, relational databases, SQL, and application development Practice.
- Career Edge - Young Professional course by TCS iON certification
- Volunteered at the Two-Day International Conference on Artificial Intelligence: From Theory to Impact, organized by MGM College, Udupi in August 2024.
